Problem

Insert problem/question here

Students who are falling behind are found only at the exam session, when it is too late to catch up.

Why?

Why are students at risk found so late?

Because

Expand on your answer

During the semester there is no reliable progress picture: the VNS shows "10/10 = 100 %" after one graded lab, and many grades are not in the VNS at all.

Why?

Why are many grades not in the VNS?

Because

Expand on your answer

Lecturers such as Ihor, with 150 students in six groups, keep lab grades in their own Excel files and send them to the dean’s office by email, each in a different format.

Why?

Why do lecturers grade outside the VNS?

Because

Expand on your answer

The work on a lab does not happen in the VNS: students send photos of their solutions in messengers at night, and the VNS only stores the uploaded file.

Why?

Why does the work on a lab not happen in the VNS?

Because

Expand on your answer

VNS courses have no live communication (0 group and 0 private conversations): a lab is only a file upload, with no place for questions, and students such as Sofiia see deadlines in scattered chats too late.

Why?

Why is the VNS only a file storage?

Because

Expand on your answer

It was set up as a standard Moodle content repository; how lecturers, students and the dean’s office actually work with labs was never mapped.

Root cause

There is no single workflow for a lab - deadline, questions and grade in one place - so progress data is scattered, late and in different formats.
