User flow: student checks deadlines, opens a course and studies a lecture with the AI assistant

1

2

Screen 1. Dashboard

Screen 2. Course page

Screen 3. Lecture + AI

Flow description

1. Dashboard: the student sees deadlines of the week, honest points progress and course cards, and opens the Algorithms course.
2. Course page: topics with lectures and labs, course chat and upcoming events; the student opens the lecture for Topic 3.
3. Lecture view: slides with an AI summary, personal notes and a question box; the student asks the AI and can return to the course.

Persona: Olena Kovalenko (student). Covers pain points: scattered deadlines, misleading grade summary, static lectures, no chat inside the course.

Good morning, Olena

Deadlines this week

- Lab 3 - Algorithms — Due: Wed — Open
- Quiz - Databases — Due: Thu — Open
- Essay - English — Due: Fri — Open

My progress (earned of all possible points)

My courses

- Algorithms — Open course 1
- Databases — Open course
- English — Open course
- Numerical Methods — Open course

1 Student clicks "Open course" on the Algorithms card
