

Definition of Ready (DoR)	Definition of Done (DoD)
1. The business requirement is clearly articulated in the format of ‘As a [role] I want [feature] so that [benefit]. 2. Full description is available on confluence and approved by PO. 3. UI/UX mockups and/or other relevant artifacts are provided and accepted by the team (where applicable). 4. Gherkin scenarios are defined. 5. All related open questions are clarified. 6. Dependencies are identified and stated. No external dependencies would block the story from being completed. 7. The story is small enough to fit in one sprint. 8. User stories are decomposed into sub-tasks, estimated and prioritized. 9. Naming convention is preserved (if relevant).	1. All sub-tasks are completed. 2. Build is successful. 3. UI matches the design. 4. Smoke tests are performed. 5. Functional test of user story is done. 6. Code review is done and all discussion items are resolved. 7. All bugs reported as issue type "Sub-Task Bug" by QA while testing the user story are resolved. 8. User story is accepted by QA.
